Region VII
324 East Eleventh Street
Kansas City, MO 64106

RECEIVED
BUREAU OF

MAR 15 1983

ENVIRONMENTAL
SANITATION

Dear Mr. Wagoner:

Enclosed are six (6) copies of the Part B Hazardous Waste Permit Application for a hazardous waste storage facility at the Olin Water Services plant in Kansas City, Kansas. The facility being proposed is merely an upgrading of the existing facility for which a Part A Hazardous Waste Permit Application was filed in November of 1980. A September 13, 1982 letter sent jointly from your office and the Kansas Department of Health and Environment to Olin Water Services requested that the six (6) copies of the Part B permit application be sent to the regional office of the U.S. EPA by March 13, 1983.

As you will note, the upgrading of the existing facility does involve construction activities. Once approval of the Part B permit application is secured, Olin Water Services will pursue all necessary local building permits and pre-construction approvals.

As the Director of Operations and Business Development for Olin Water Services, I have secured signing authority for this submission through formal corporate procedures. Please call me at (913) 642-7100 or Mark Pelley, Environmental Affairs Specialist, at (203) 356-3156 if you have any question regarding this submission.

Very truly yours,

OLIN WATER SERVICES
OLIN CORPORATION

Blaine M. Madsen
Director, Operations and
Business Development
